APPELLANT’S SOLZE V. SHINSEKI NOTICE TO THE COURT

Pursuant to *Solze v. Shinseki*, 26 Vet. App. 299, 303 (2013), Appellant Donald A. Dallman hereby advises the Court of developments that could affect the Court’s decision in the instant appeal.

On May 4, 2020, Appellant’s counsel received a Statement of the Case (“SOC”) dated April 9, 2020. It denied entitlement to an April 20, 1999, effective date for service connection for right thigh hematoma residuals. *See* Secretary’s May 4, 2020, Notice to the Court, Exhibit B (“Secretary’s Exhibit B”) at 16. The SOC explained:

“The Board of Veterans’ Appeals decision dated April 4, 2018, notes service connection for residuals of right thigh hematoma was previously denied by the regional office in a December 1999 rating decision and states you did not timely appeal this determination or submit new and material evidence within one year of the rating decision notification.”

Id.

The Veteran asserts the Board's determination that the December 1999 rating decision became final is itself a final decision, which precludes the assignment of an effective date for service connection based upon the April 1999 initial claim, and is therefore both prejudicial and appealable. See Appellant's Brief at 14-15; Appellant's Reply Brief at 9; Appellant's Motion for Reconsideration at 4-5; Appellant's Notice of Supplemental Authorities at 2. Accordingly, the April 2020 SOC's rationale for denying entitlement to an earlier effective date for service connection is relevant to Mr. Dallman's briefs and filings.

Respectfully submitted,
